Why you'll love GitHub

Powerful features to make software development more collaborative.

Great collaboration starts with communication.

Review changes, comment on lines of code, report issues, and plan the future of your project with discussion tools.

Friction-less development across teams.

Work with project collaborators or teams of people in organization accounts to communicate with ease.

World's largest open source community.

Share your projects with the world, get feedback, and contribute to millions of repositories hosted on GitHub.

### Do more with powerful integrations.

Discover applications and tools that integrate with GitHub to help you and your team build software better, together.

The easiest way to use GitHub on a Mac

Download GitHub for OS X

OS X 10.9 or later. Learn more

You can also use GitHub on Windows.

A green "Sign up" button here + the big one down there could end up in a distracting "power fight".

A tiny octocat icon serves as a subtle visual anchor for users coming to this page for signin.

One big button is always more prominent than two buttons

A lighter shade of blue, for added contrast

"... to use GitHub on a Mac"

Writing "... to use GitHub on Mac" infers that "Mac" is the proper name for the operative system. Which is wrong, because "OS X" is the proper name.

When you need to use the friendly name, you can use "... on a Mac", which is the friendly name of a computer running OS X as a whole

"... for OS X"

*Use the friendly name: "... for your Mac"*

- or -

Use the proper name: "... for OS X"

Using "... for Mac" is like a wrong fusion of the two options (friendly or proper)

You can also use GitHub on Windows.

Grouping and centering together the octocat and the copyright statement, makes you able to have two quasi-specular link groups at each side of the footer.

Which is a clear win for a symmetry-nerd with a mild form of OCD ;-p
